UserWay Tutorial – How to enable/disable UserWay's Accessibility Widget on mobile devices

Audio	Visual
<p>Hi everyone!</p>	<p>Woman wearing a UserWay shirt is speaking, her video is in a small box in the left corner of the screen. This box remains throughout the video.</p> <p>A website appears in the main screen showing a site with the title "Presidio of San Francisco." On the website is the image of several iconic San Francisco homes.</p>
<p>In this tutorial, I'm going to show you how to enable or disable UserWay widget on mobile devices.</p>	<p>The image does not change.</p>
<p>So on your site click on the widget.</p>	<p>A cursor appears with a yellow circle around it. The cursor moves to the UserWay widget icon in the top-right corner of the screen and clicks. The UserWay widget features menu opens.</p>
<p>And then click on 'Manage' to access widget settings.</p>	<p>The cursor moves down the widget menu to the 'Manage' link and clicks.</p>
<p>Then scroll a bit down and find mobile settings.</p>	<p>The widget settings menu opens. The cursor scrolls down to the 'Mobile Settings' link and hovers over it.</p>
<p>Let's click on it.</p>	<p>The cursor clicks on the 'Mobile Settings' link.</p>
<p>Right now the widget is enabled on mobile devices.</p>	<p>The mobile settings menu appears. A toggle button appears next to text that reads "Enable the widget on mobile devices." The toggle is green indicating that the widget is enabled.</p>
<p>And if you want to disable it just click on the button.</p>	<p>The cursor moves to the green button and clicks it so it is no longer green.</p>
