

UserWay Tutorial – Install on Muse  
<https://userway.org/platforms/muse>

Audio	Visual
<p>Hi everyone. In this tutorial, I'm going to show you how to manually install UserWay widget in Adobe Muse. You must follow all the steps to get the code snippet that you later paste in Muse. Some steps are customization options that you can actually skip and go through them later. But in this tutorial, I will show you all of the steps.</p>	<p>Woman wearing a UserWay shirt is speaking, her video is in a small box in the lower right corner of the screen. This box remains throughout the video.</p> <p>The main screen shows a page from the UserWay website</p>
<p>First thing you have to do is visit UserWay.org and click on "Get the Widget."</p>	<p>The cursor moves to the upper right corner of the UserWay website and clicks the "Get the Widget" button next to the UserWay icon. Step 1 of the code generation questionnaire appears.</p>
<p>Step number one - add your website address. Also, don't forget to agree to the terms of service and privacy policy. Let's continue to step number two</p>	<p>The example website's URL appears in the "What's your website's address?" window. The cursor clicks the "I agree" checkbox and the "Next" button.</p>
<p>And your name, last name, and your email. And continue to step number three.</p>	<p>Step 2 of the questionnaire appears. Sample values appear in these form windows. The cursor clicks the "Next" button in the lower right corner. The form advances to the next page. The cursor clicks the "Next" button.</p>
<p>Here you can choose the icon that you want to display. You select among these four. Now let's continue to step number four.</p>	<p>Step 3 appears. The cursor highlights the four icon choices, leaving the first (default) option selected. The cursor clicks the "Next" button.</p>
<p>Here you will choose the size. No matter which size you choose, mobile devices will always display the smaller size.</p>	<p>Step 4 appears, showing the two icon size choices. The cursor hovers over the smaller icon, then clicks the "Next" button, leaving the larger (default) icon size selected.</p>
<p>Now let's continue to step number 5, where you can pick the color of your button with this color picker. Now let's continue to step number six.</p>	<p>Step 5 appears, showing a spectrum bar and swatch selector. The cursor clicks the "Next" button.</p>

## UserWay Tutorial – Install on Muse

<https://userway.org/platforms/muse>

<p>You can also choose the position. As you can see, there are eight different positions, so just click over the one you prefer. Continue to step number seven.</p>	<p>Step 6 appears, and the cursor highlights the eight possible icon positions around the perimeter of a webpage layout. The cursor clicks the upper center position, then the upper right position and clicks the “Next” button, leaving the upper right (default) setting selected.</p>
<p>If you want the widget to automatically detect the language of your visitor, then you should leave the default option “auto-detect language.” But if you want to force the widget to display in a specific language, then display this list and select your preferred language.</p>	<p>Step 7 appears. The cursor highlights the “Language” field, in which contains the default text, “Auto-Detect Language.” The cursor clicks the dropdown arrow in the “Language” box and a list of languages appears.</p>
<p>No let’s continue to step number eight.</p>	<p>The cursor clicks out of the dropdown menu, restoring the default selection and clicks the “Next” button.</p>
<p>You are already making your site accessible, but it’s also very important to have an accessibility statement. If you don’t have one, don’t worry about it, because we can help you with that. Just remember to leave “No” selected, and we’ll help you with that later.</p>	<p>Step 8 appears, asking if the user’s site already contains an accessibility statement. “No/I Don’t Know” is the default selection. The cursor clicks the “Next” button.</p>
<p>Now let’s continue to step number nine. So, if you’re interested in advanced custom options for this widget, then I recommend you to select “I’d like to learn more” for more information.</p>	<p>The form advances to Step 9, displaying an option to learn more about a white-label or custom-branded version of the UserWay widget. The cursor clicks the “Next” button.</p>
<p>And now I’m gonna scroll down to our last step.</p>	<p>The cursor scrolls down to click on the “Next” button.</p>
<p>Here’s the code. So, just click on “Copy” and let’s go to Adobe Muse.</p>	<p>Step 10 appears, showing a window containing the UserWay script. The cursor clicks on the “Copy” button in the window’s upper right corner. The code is highlighted.</p>
<p>I’m in Adobe Muse, and the code is copied to my clipboard. So now, I’m gonna show you how to paste it here. Click on “Object” and “Insert HTML.”</p>	<p>The screen transitions to the example site’s Muse management page. The cursor clicks on “Object” in the top menu bar. A menu appears and the cursor clicks on “Insert HTML.”</p>

## UserWay Tutorial – Install on Muse

<https://userway.org/platforms/muse>

<p>Here we are going to paste our code. Gonna get rid of this text and paste the code.</p>	<p>The HTML Code window appears with the message “Insert your HTML here.” The cursor deletes the sample text and paste’s the script into the window.</p>
<p>Just click on “OK,” and we’re done.</p>	<p>The cursor clicks the “OK” button on the right side of the window.</p>
<p>You can see this is the HTML code. I’m just going to move it out of the workspace. You can leave it actually anywhere, so it won’t disturb you when you’re designing. Just gonna leave it out here. You can see the icon.</p>	<p>The cursor clicks on a box displaying the UserWay icon and drags it off the page.</p>
<p>And now I’m going to preview the site to make sure everything looks OK. So, click on “File...Preview Site in Browser.”</p>	<p>The cursor clicks “File” in the top menu bar. A dropdown menu appears, and the cursor clicks on “Preview Site in Browser.” The site preview window appears.</p>
<p>And as you can see, here is our widget. If this button is placed correctly on you Adobe Muse site, this means that you’ve done everything correctly.</p>	<p>The cursor clicks the UserWay widget icon in the upper right. The “Accessibility” menu appears.</p>
<p>Also, there’s another way to verify the installation. Let’s go back to userway.org, and I’ll show you. You can click on this button to verify again that the installation has been done correctly.</p>	<p>The screen returns to the UserWay site page with the script highlighted in Step 10. The cursor highlights the “Let’s Verify” button.</p>
<p>Or you can skip it, and you get your accessibility statement. So, this is a template that we’re sharing with you. You can customize it, add your own details, and bring it to your site.</p>	<p>The cursor clicks the “Skip” button next to “Let’s Verify.” A page appears, displaying an accessibility statement.</p>
<p>If you want to learn how to install UserWay widget in other platforms like Squarespace, Webflow, WordPress, and many more, you can follow the videos that you can see on your screen right now. Visit UserWay’s YouTube channel, and in the description below this video, you’ll find a list of all the installation guides for other platforms.</p>	<p>The host appears in full screen, surrounded by the UserWay logo and banners linking to other tutorials.</p>
<p>Don’t forget to subscribe!</p>	<p>Fade to black.</p>
