

UserWay Tutorial – Install on Webflow  
<https://userway.org/platforms/webflow>

Audio	Visual
<p>Hi everyone. In this video, I'm going to show you how to install UserWay widget in Webflow. You must follow all these steps to get the code snippet that you will later paste on your Webflow site. Some steps are customization options that you can actually skip and go through them later. But in this video, I will show you all of the steps.</p>	<p>Woman wearing a UserWay shirt is speaking, her video is in a small box in the lower right corner of the screen. This box remains throughout the video.</p> <p>The main screen shows a page from the UserWay website</p>
<p>Now to get your code, visit UserWay.org and click on "Get the Widget."</p>	<p>The cursor moves to the upper right corner of the UserWay website and clicks the "Get the Widget" button next to the UserWay icon. Step 1 of the code generation questionnaire appears.</p>
<p>Step number one is, add your website address. Also, don't forget to agree to the terms of service and privacy policy. Click on "Next."</p>	<p>The example website's URL appears in the "What's your website's address?" window. The cursor clicks the "I agree" checkbox and the "Next" button.</p>
<p>And add your name, last name, and your email. Let's continue to step number three.</p>	<p>Step 2 of the questionnaire appears. Sample values appear in these form windows. The cursor clicks the "Next" button in the lower right corner. The form advances to the next page. The cursor clicks the "Next" button.</p>
<p>Here you can select the icon that you want to display. You choose among these four. Continue to step number four.</p>	<p>Step 3 appears. The cursor highlights the four icon choices, leaving the first (default) option selected. The cursor clicks the "Next" button.</p>
<p>Choose your size. No matter which size you choose, mobile devices will always display the smaller size. Let's click on "Next" to step number 5.</p>	<p>Step 4 appears, showing the two icon size choices. The cursor hovers over the smaller icon, then clicks the "Next" button, leaving the larger (default) icon size selected.</p>
<p>You can use this color picker to change the color of your button, so it matches the rest of your design. When you're ready, click on "Next" to step number six – select the position.</p>	<p>Step 5 appears, showing a spectrum bar and swatch selector. The cursor clicks the "Next" button.</p>

## UserWay Tutorial – Install on Webflow

<https://userway.org/platforms/webflow>

<p>Choose where you want to display your button on your site. You have eight different positions. Scroll down and click on “Next” to step number seven.</p>	<p>Step 6 appears, and the cursor highlights some of the possible icon positions around the perimeter of a webpage layout. The cursor clicks the “Next” button, leaving the upper right (default) setting selected.</p>
<p>Choose your language. You can let the widget to automatically detect your user’s language, or if you want to force the widget to display in a specific language, then open this list and select your language.</p>	<p>Step 7 appears. The cursor highlights the “Language” field, in which contains the default text, “Auto-Detect Language.” The cursor clicks the dropdown arrow in the “Language” box and a list of languages appears.</p>
<p>When you’re done, click “Next” to step number eight.</p>	<p>The cursor clicks out of the dropdown menu, restoring the default selection and clicks the “Next” button.</p>
<p>Your site must have an accessibility statement. If you don’t have one, don’t worry about it, because we can help you with that. Just leave “No/I Don’t Know” selected, and we’ll help you with that later. Now we can continue to step number nine.</p>	<p>Step 8 appears, asking if the user’s site already contains an accessibility statement. “No/I Don’t Know” is the default selection. The cursor clicks the “Next” button.</p>
<p>If you’re interested in advanced custom options for this widget, then I recommend you to click “I’d like to learn more” for more information.</p>	<p>The form advances to Step 9, displaying an option to learn more about a white-label or custom-branded version of the UserWay widget. The cursor clicks the “Next” button.</p>
<p>Let’s scroll down and click on “Next” for our last step.</p>	<p>The cursor scrolls down to click on the “Next” button.</p>
<p>Here is our code. Let’s click on the “Copy” button, and I’ll see you in Webflow.</p>	<p>Step 10 appears, showing a window containing the UserWay script. The cursor clicks on the “Copy” button in the window’s upper right corner. The code is highlighted.</p>
<p>I’m in Webflow dashboard. Code is copied to my clipboard. I’m going to show you where you have to paste this code.</p>	<p>The screen transitions to the example site’s Webflow dashboard page.</p>
<p>So, select your project. This is mine over here. Let’s click on these three dots and go to “Settings.”</p>	<p>The cursor clicks the “...” link under the thumbnail of the example website project. A submenu appears, and the cursor clicks the “Settings” option. The Settings menu appears.</p>

## UserWay Tutorial – Install on Webflow

<https://userway.org/platforms/webflow>

Up here, we can see “Custom Code.”	The cursor clicks the “Custom Code” tab in the top menu bar. That window loads.
So, let’s scroll down until we find “Footer Code.” So, here’s where we’re going to paste our code.	The cursor scrolls down the page and clicks in the Footer Code panel. The cursor pastes the code.
Let’s do it, and click on “Save Changes.”	The cursor clicks the “Save Changes” button in the upper right of the panel.
Now let’s publish our site. Click on “Publish...Publish to Selected Domains.”	The cursor scrolls back to the top of the window and clicks the “Publish” button in the upper right. A menu drops down, and the cursor clicks on the “Publish to Selected Domains” button.
And now, let’s preview our site. This is our Webflow site. And here’s our widget. If you can see the widget properly, that means that you have done everything correctly.	The example website appears. The cursor clicks the UserWay widget icon in the upper right corner. The Accessibility menu appears.
But there’s another way to verify this installation. Let’s go back to userway.org and show you how. Here you can click on “Let’s Verify” button to make sure you’ve run the installation correctly. But again, if you can see the widget, that means that everything’s OK.	The screen returns to the UserWay site page with the script highlighted in Step 10. The cursor highlights the “Let’s Verify” button.
So, you can click on “Skip.” And here’s your accessibility statement. This is a template that we’re sharing with you. You can copy it; you can add your own details, customize it as you need, and paste it on your site.	The cursor clicks the “Skip” button next to the “Let’s Verify” button. The accessibility statement appears.
If you want to learn how to install UserWay widget in other platforms like Squarespace, Webflow, WordPress, and many more, you can follow the videos that you can see on your screen right now. Visit UserWay’s YouTube channel, and in the description below this video, you’ll find a list of all the installation guides for other platforms.	The host appears in full screen, surrounded by the UserWay logo and banners linking to other tutorials.
