

UserWay Tutorial – Install on Wix - standard

<https://userway.org/platforms/wix>

Audio	Visual
<p>Hi everyone. In this video, I'm going to show you how to install UserWay widget in Wix. You must follow all these steps to get the code snippet that you will later paste on your Wix site. Some steps are customizations options that you can actually skip and go through them later. But in this tutorial, all will show you all of them.</p>	<p>Woman wearing a UserWay shirt is speaking, her video is in a small box in the lower right corner of the screen. This box remains throughout the video.</p> <p>The main screen shows a page from the UserWay website</p>
<p>Let's get started! So, visit userway.org and click on "Get the Widget."</p>	<p>The cursor clicks the "Get the Widget button" in the upper right of the website, next to the UserWay Icon. Step 1 of the code generation questionnaire appears.</p>
<p>Step number one is, add your website address. Also, don't forget to agree to the terms of service and privacy policy. Click on "Next."</p>	<p>The example website's URL appears in the "What's your website's address?" window. The cursor clicks the "I agree" checkbox and the "Next" button. Step 2 of the questionnaire appears.</p>
<p>And in step number two, add your name, last name, and your email. Click on continue to step number three.</p>	<p>Sample values appear in these form windows. The cursor clicks the "Next" button in the lower right corner. The form advances to the next page. The cursor clicks the "Next" button. Step 3 appears.</p>
<p>Here you can choose the icon that you want to display on your site. You choose among the four. Let's continue to step number four, where you will choose the size of your button.</p>	<p>The cursor highlights the four icon choices, leaving the first (default) option selected. The cursor clicks the "Next" button. Step 4 appears, showing the two icon size choices.</p>
<p>No matter which size you choose, mobile devices will always display the smaller size.</p>	<p>The cursor hovers over the smaller icon, then clicks the "Next" button, leaving the larger (default) icon size selected.</p>
<p>Let's continue to step number 5, where you can pick the color of your button, so it matches your site. Click on "Next" to step number six, and you will choose the position.</p>	<p>Step 5 appears, showing a spectrum bar and swatch selector. The cursor clicks the "Next" button.</p>

UserWay Tutorial – Install on Wix - standard

<https://userway.org/platforms/wix>

<p>As you can see, there are eight different positions. So, select your preferred one. Continue to step number seven, where you will choose your preferred language.</p>	<p>Step 6 appears, and the cursor highlights the eight possible icon positions around the perimeter of a webpage layout. The cursor clicks the upper center position, then the upper right position and clicks the “Next” button, leaving the upper right (default) setting selected.</p>
<p>The default option is auto-detect language, so you will let the widget to automatically detect the language of your visitor. But if you want to force the widget to display in a specific language, then open this list and select yours.</p>	<p>Step 7 appears. The cursor highlights the “Language” field, in which contains the default text, “Auto-Detect Language.” The cursor clicks the dropdown arrow in the “Language” box and a list of languages appears.</p>
<p>Let’s continue to step number eight. Making your website accessible is very important. But you also must have an accessibility statement. If you don’t have one, don’t worry about it, because we can help you with that. Just leave “No” selected, and we’ll help you with this later. Let’s continue to step number nine.</p>	<p>Step 8 appears, asking if the user’s site already contains an accessibility statement. “No/I Don’t Know” is the default selection. The cursor clicks the “Next” button. The cursor clicks out of the dropdown menu, restoring the default selection and clicks the “Next” button.</p>
<p>If you’re interested in advanced custom options for this widget, then I recommend you to click “I’d like to learn more” for more information.</p>	<p>The form advances to Step 9, displaying an option to learn more about a white-label or custom-branded version of the UserWay widget. The cursor clicks the “I’d Like to Learn More” button, then the “Next” button.</p>
<p>And finally, let’s scroll down to the last step, where we’ll get our code.</p>	<p>The cursor scrolls down the page and clicks on the “Next” button. Step 10 appears, showing a window containing the UserWay script.</p>
<p>We’re going to paste this code just before the body closing tag. I’ll show you where this is in Wix. So, click on “Copy,” and let’s go to Wix.</p>	<p>The cursor clicks on the “Copy” button in the window’s upper right corner. The code is highlighted.</p>
<p>I’m in Wix website editor. The code is copied to my clipboard. So, follow me. and click on “Settings” and “Tracking and Analytics.”</p>	<p>The screen transitions to the example site’s Wix editor page. The cursor clicks on the “Settings” tab in the top menu bar. A dropdown menu appears, and the cursor clicks on the “Tracking and Analytics” link.</p>

UserWay Tutorial – Install on Wix - standard

<https://userway.org/platforms/wix>

Click on “New Tool,” and add a custom code.	The “Tracking Tools & Analytics” window appears. The cursor clicks the “New Tool” button at the top of the window. A dropdown menu appears, and the cursor clicks the “Custom” link. The “Custom Code” form overlays the page.
So, up here’s where we have to past our code snippet.	The cursor clicks the clicks in the code window and pastes the snippet.
Name it “UserWay” so it will be easier to identify this code from others.	The cursor types “UserWay” into the “Name” field.
And add the code to all pages and select “Load Code” on each new page.	The cursor clicks the “All Pages” option. It clicks the “Add Code Pages” dropdown menu and selects “Load Code on Each New Page.”
And last, place the code in body and click on “Apply.”	The cursor clicks the “Body” option from the “Load Code In:” field. The cursor scrolls down and clicks the “Apply” button.
As you can see, this is our code. So, I’m just gonna close it.	A window appears, displaying “UserWay” in the “Body End” window. The cursor closes the window.
So, let’s click on “Publish.” Done. And let’s view the site.	The site’s Wix page editor appears. The cursor clicks the “Publish” entry in the top menu bar, then on “View Site” in the popup that appears.
So, if we see the widget, tis means that we have installed it correctly. And here it is.	The site appears. The cursor clicks the UserWay widget icon in the upper right corner. The Accessibility menu appears.
There’s another way to verify this installation. Let’s go back to userway.org.	Step 10 from the installation process appears, showing the snippet highlighted in the code window.
You can click on “Let’s Verify.” But, again, if you see the widget, that means that you’ve done everything correctly. So, you can skip this.	The cursor highlights the “Let’s Verify” button. The cursor clicks the “Skip” button next to “Let’s Verify.”
And here’s your accessibility statement. This is a template that you can copy. You can edit; you can add your own details. Just copy it and paste it on your site.	The accessibility statement appears.
