

Audio	Visual
<p>Hi everyone! In this tutorial, I'm going to show you how to install UserWay widget on your Wix site.</p>	<p>The main image is of the UserWay homepage. There is a smaller video in the lower right corner showing the female narrator. The smaller video plays in the corner for the video's duration showing the narrator.</p>
<p>You must follow all the steps from this video to get the code snippet that you will later paste on your Wix site.</p>	<p>Image does not change.</p>
<p>Some steps are customization options that you can actually skip and go through them later. But in this tutorial, I will show you all of the steps.</p>	<p>Image does not change.</p>
<p>Now to get your widget visit userway.org and click on 'Start free trial.'</p>	<p>A cursor appears on the UserWay homepage screen and clicks on the 'Start free trial' button at the top of the screen.</p>
<p>Step number one fill in your name, last name, your email address, and your website.</p>	<p>A page opens that says "Step 1" at the top with fields to fill in your name and website address. The fields are filled in with sample information.</p>
<p>Also, don't forget to agree to UserWay Terms of Use, Privacy Policy, Cookie Policy, and Font</p>	<p>The cursor moves and clicks on a checkbox under the form fields.</p>

<p>License.</p>	
<p>Click on 'Next' to step number two.</p>	<p>The cursor clicks on a blue button that says “Next.”</p>
<p>You can choose our free accessibility widget but your site will be partially compliant.</p>	<p>The page changes to show “Step 2” on the left you can select the free widget and on the right you can choose the paid widget for full compliance. The paid widget has three options, yearly, monthly, or 10-day free trial.</p>
<p>However, if you want your site to be full ADA and WCAG compliant, then make sure you choose one of the options on the right.</p>	<p>The image does not change.</p>
<p>Then click on 'Next' to step number three.</p>	<p>The cursor clicks on the blue “Next” button.</p>
<p>Here's your script. We've also just emailed this script to you.</p>	<p>The page changes to show an image of code. There are three options of “Basic Script,” “Advanced Script,” and “White Label Script.” The current view shows the Basic Script with a button to copy the code in the upper-right corner.</p>
<p>Now you can click on 'Copy.' Go</p>	<p>The cursor clicks the “Copy”</p>

<p>to Wix and install the widget. But first, I'll show you all the configuration options that UserWay widget has.</p>	<p>button. The button changes to read “Copied!”</p>
<p>So I'm going to click on 'Configure.'</p>	<p>The cursor moves to the blue “Configure” button beneath the code.</p>
<p>Step number four, you can select your preferred icon type. You can choose among these four.</p>	<p>The page changes to show “Step 4” where you can choose your widget button. There are four button types to pick from.</p>
<p>Then click on 'Next' or 'Skip' if you want to customize it later.</p>	<p>The cursor clicks on the blue “Next” button.</p>
<p>In step number five you can choose the size of your accessibility button.</p>	<p>The page changes to show “Step 5” where there are two button sizes to choose from. The larger button is selected as shown by a green outline.</p>
<p>Then click on 'Next' to step number six.</p>	<p>The cursor clicks on the blue “Next” button.</p>
<p>You can change the color of your button using this color picker.</p>	<p>The page changes to show “Step 6” with a color gradient and hex code field to input your button color. The cursor moves around the color gradient to emphasize how many different colors you can choose from.</p>
<p>Then click on 'Next' to step number seven.</p>	<p>The cursor clicks on the blue “Next” button.</p>
<p>Select where you want to place the accessibility button on your site.</p>	<p>The page changes to show “Step 7” with a drawing of a computer screen and empty circles</p>

	indicating where you can place the widget. The top-right corner circle is colored blue and has a checkmark in it indicating it has been chosen as the widget's location.
Then click on 'Next' to step number eight.	The cursor moves to click on the blue "Next" button.
Choose your widget's language. You can let the widget to automatically detect the user's language. Or you can select a specific language from this list.	The page changes to "Step 8" where you can change your widget's default language. The auto-detect language option is selected. The cursor clicks on the field to show the variety of other languages you can choose from. The cursor does not select a new option and clicks away from the language menu.
Then click on 'Next' to step number nine.	The cursor moves to the blue "Next" button.
Your site needs an accessibility statement so if you don't have one don't worry about it because we can help you with that just leave 'No/I don't know' selected.	The page changes to "Step 9" where you can choose if you have an Accessibility Statement. The options are Yes or No/I don't know. The No/I don't know option is selected.
Then click on 'Next' and you're all set.	The cursor moves to the blue "Next" button.
So let's go to Wix and let's install the widget.	A new page shows a green checkmark at the top with "You're all set!" written below it. There is a blue button beneath the text that says "Continue to

	Your Dashboard.”
To install UserWay widget, get into your dashboard and on the left menu scroll down and click on 'Settings.'	The screen fades out and fades back in to show a Wix dashboard page. The video of the woman is still shown in the corner of the screen. The cursor moves to the left-side menu and scrolls down to click on the “Settings” option.
And in Advanced Settings click on 'Custom Code.'	The page changes to show the Settings options. The cursor scrolls down to show the “Custom Code” option and clicks on it.
You can click on 'Add Custom Code' or directly add code inside the body end. Just always make sure that the code is inside the body end.	The page changes to show the Custom Code page. The cursor moves to point to a blue “Add Custom Code” button. The cursor then scrolls down the page to show the “Body End” area where you can also add code.
Click on 'Add Code.'	The cursor clicks on the “Add Code” option.
Now paste the code. The script might still be copied to your clipboard.	An “Add Custom Code” popup form appears on the screen.
And if not check your email because we've also emailed the script to you. Once you grab it, paste it. You should also rename it.	The cursor clicks in the box that says, “Paste the code snippet here” and pastes the code. The cursor then clicks in the “Name” field and renames it “UserWay.”
And select load code on each	The cursor then moves to the

<p>new page.</p>	<p>“Add Code to Pages” option and clicks. A drop-down menu appears and the cursor scrolls to select “Load Code on Each New Page.”</p>
<p>Then click on 'Apply' and you're done.</p>	<p>The cursor moves to the bottom-right of the screen and clicks on the blue “Apply” button.</p>
<p>One last thing, preview your site to make sure you've installed the widget correctly.</p>	<p>The page changes to take us back to the “Custom Code” page and shows the “Body End” box now filled in with the UserWay code.</p>
<p>So I'm going to preview my site. And here's the widget. [Mechanical computer sound]</p>	<p>The page changes to show the sample Wix site with the UserWay widget correctly installed. The widget menu opens.</p>
<p>If you can't see your widget, remember to refresh your site to make the changes effective.</p>	<p>The image does not change.</p>
<p>If you want to learn how to install UserWay widget in other platforms like Squarespace, Webflow, WordPress, and many more, you can follow the videos that you can see on your screen right now.</p>	<p>The sample webpage fades out and the image of the woman talking becomes the primary image on the screen.</p>
<p>Visit UserWay's YouTube channel and in the description below this video you'll find a list of all the installation guides for other platforms.</p>	<p>The woman continues to speak.</p>
